THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME XL.

(January – June, 1930.)

INDEX.

A.

Aborted cows and spaying, 432.
Actinomycosis in cattle, 99.
Allan, H. H.—
  Woolly finger-grass, 28.
  Spartina Townsendii: 2. Experience in New Zealand, 189.
Allan, H. H., and Zotov, V. D.—The Canary grasses in New Zealand, 256.
Annual grasses and clovers in pasture, relationship and control of, 147.
Answers to inquiries, 71, 144, 216, 289, 358, 432.
Ante-natal deformity of lambs: A preliminary investigation in Otago, 294.
Apiary, the (monthly notes), 61, 133, 208, 280, 350, 424.
Apples and pears, packing of, for export, 309.
Apples, cold storage of: Investigations at Nelson, 271.

B.

Barley, estimated yield of, 146.
Barley, seed, hot-water treatment of (Canterbury experiments), 104.
Bell, J. E.—Early-potato growing in Franklin County, 232.
Blindness in sheep, 358.
Bluestone solution for drenching sheep, 145.
Bonus offered for major improvements in manufacture of phormium fibre, 218.
Books received, 431.
Boswell, G. R. B.—Planning of the test-room at dairy factories, 391.
Bovines, parturition in, 23, 100.
Brown, F. C.—Poultry-keeping, 59, 130, 206, 277, 348, 422.
Burdock, control of, on hill country, 358.
Burnt flavour in cream or butter, 108.
Bush sickness, carbonate of iron for, 188.
Butterfat losses in buttermilk: Investigation in Auckland Province, 118.
Buttermilk, butterfat losses in, 118.

C.

Calculating yield of standardized cheese per pound of fat, 180.
Calving of dairy cows, 23, 100.
Campbell, J. A.—Packing of apples and pears for export, 309.
Canadian and New Zealand dairy cows, average production of, 285.
Canary grasses in New Zealand, the, 256.
Carbonate of iron for bush sickness, 188.
Case of openness in cheese due to yeast fermentation, 178.
Castration of pigs and calves, 415.
Cattle, classification of, in New Zealand, 214.
Cellophane paper and wood-taint in butter, 406.
Census and Statistics Office—
  Statistics of top-dressing on farms, 143.
  Utilization of occupied rural lands, 199.
  Classification of cattle, 214.
  Statistics of farm machinery and engines, 225.
  Statistics of irrigated lands in New Zealand, 255.
Certificate-of-record and Official Herd-test, 270.

Certificate-of-record system in 1929, review of, 159.
Certification of rye-grass seed, 1929–30 season, 68.
Certification of seed potatoes: Provisional certificates issued for season 1929–30, 354.
Cheese, estimation of moisture in, 197.
Cheese openness due to yeast fermentation, 178.
Cheese, openness in, 308.
Cheese, salting of, 172.
Cheese, standardized, calculating yield of per pound of fat, 180.
Cheesemaking, starters for, 319.
Chemistry Section—
Carbonate of iron for bush sickness, 188.
Chilean nitrate organization, 433.
Cockayne, A. H.—Evolution of grassland farming in New Zealand, 219.
Citrus-culture notes, 59, 130, 205, 276, 347, 422.
Clipping of horses, 274.
Cockayne, L.—The indigenous flora and vegetation of New Zealand, 325.
Cold storage of apples: Nelson investigations, seasons 1927 and 1928, 271.
Concentrates, feeding of, to dairy cows at Stratford Demonstration Farm, 112.
Connell, R. P.—
The Farm, 53, 124, 200, 272, 341, 417.
Eradication of tall fescue, 93.
Control of ragwort and other weeds by spraying: Remarkable results with sodium and calcium chlorate, 291.
Corrections, 306, 362, 416, 428.
C.O.R. lists, 65, 140, 284.
Cows, aborted, and spaying, 432.
Credit, rural, in New Zealand, 395.
Crops, minor, 213.

D.

Dairy-cow diseases, 31, 75, 181.
Dairy cows, average production of, Canadian and New Zealand, 285.
Dairy cows, purebred, testing of (annual review for 1929), 159.
Dairy Division—
C.O.R. lists, 65, 140, 284.
Cellophane paper and wood-taint in butter, 406.
Dairy-farm groups in North Auckland, an economic survey of, 241, 300.
Dairy Science Association (New Zealand).—Estimation of moisture in cheese, 197.
Dargaville group of dairy-farms, an economic survey of, 300.
Davies, Wm.—See E. Bruce Levy and Wm. Davies, 147, 363.
Dayus, C. V.—Poisoning of live-stock, 386.
Dayus, C. V., and others.—Iodine deficiency and live-stock, 226.
Deem, J. W.—
Control of ragwort and other weeds by spraying, 291.
Deformity of lambs, ante-natal, 294.
Digitaria eriantha var. *stolonifera*, 28.
Diseases of dairy cows, 31, 75, 181.
Dog with sore feet, 289.
Down-cross export lambs from Ruakura, 357.

E.

Early-potato growing in Franklin County: Manurial experiments at Pukekohe, 1926 to 1929, 232.
Earp, E. A.—The apiary, 61, 133, 208, 280, 350, 424.
Economics Section.—An economic survey of the poultry industry in New Zealand, 173.
Economic survey of dairy-farm groups in North Auckland, season 1927–28, 241, 300.
Economic survey of the poultry industry in New Zealand, 173.
Economic study of East Coast sheep-farms, an, 1.
Electricity, relation of, to agriculture, 210.
Empire farmers at Ruakura Farm of Instruction (photo group), 288.
Empire wool survey: Report by Dr. Nicholls on New Zealand conditions, 311.
Ensilage and dairy cows, 321.
Ensilage, feeding to sheep, 251.
Ensilage, oats and vetches for, 359.
Eradication of tall fescue in Manawatu district, 93.
Esson, J. J.—Rural finance in New Zealand, 395.
Estimation of moisture in cheese, 197.
Evolution of grassland farming in New Zealand, 219.

F.

Farm machinery and engines, statistics of, 225.
Farm, the (monthly notes), 53, 124, 200, 272, 341, 417.
Fawcett, E. J.—
Hill country sheep-farming in the North Island, 1.
An economic survey of dairy-farm groups in North Auckland, season 1927–28, 241, 300.
Feeding ensilage to sheep, 251.
Feeding of iodine to poultry, 403.
Feeding of concentrates to dairy cows, 112.
Fern country, grass-establishment on, 71.

Fertilizers, importation of, in 1929–30, 338.
Fertilizers, purchase of—meaning and use of the invoice certificate, 392.
Fescue, tall, eradication of, 93.
Fields Division—
Feeding ensilage to sheep, 251.
Certification of seed potatoes: Provisional certificates issued for season 1929–30, 354.
Flora and vegetation, indigenous, of New Zealand, 325.
Flue-barn curing of tobacco-leaf: A standard design and notes on method, 320.
Fruit-export levy, 287.
"Fungous Diseases of Plants" (review), 429.

G.

Goats and foot-rot, 145.
Goats and forests, 30.
Gore Experimental Area: Record of 1928–29 season's work, 41.
Gorse parasite, 196.
Grading of certified seed potatoes, 264.
Grapes, table, outdoor culture of, 322.
Grasses and clovers, annual, in pasture, 147.
Grass-establishment on fern country, 71.
Grass seed mixtures, 124.
Grassland evolution at Tutira, 84.
Grassland farming, evolution of, in New Zealand, 219.
Grimmett, R. E. R., and others—Iodine deficiency and live-stock, 226.
Ground limestone and burnt lime, 433.
Gwillim, W. E.—Calculating yield of standardized cheese per pound of fat, 180.

H.

Hadfield, J. W.—
Certification of rye-grass seed, 68.
Grading of certified seed potatoes, 264.
Hewlett, C. H.—Hot-water treatment of seed barley, 104.
Hill country sheep-farming in the North Island: An economic study of East Coast farms, 1.
Hogget mortality and its prevention, 38.
Honey poisoning, alleged, 117.
Hopkirk, C. S. M. — Ante-natal deformity of lambs, 294.
Hopkirk, C. S. M., and others.—Iodine deficiency and live-stock, 226.
Horticulture (monthly notes), 62, 135, 209, 281, 351, 426.
Hot-water treatment of seed barley: Field experiments in Canterbury, season 1928–29, 104.
Hydatid tablets for dogs, 283.
Hyde, W. C.—Horticulture, 62, 135, 209, 281, 351, 426.

I.

Importation of fertilizers in 1929–30, 338.
Indigenous flora and vegetation of New Zealand, 325.
Intermediate credit system in New Zealand, 395.
Inventions of agricultural interest, 74, 215, 362.
Iodine deficiency and live-stock: A preliminary investigation in the Wanaka area, 226.
Iodine, feeding of, to poultry, 403.
Irrigated lands in New Zealand, statistics of, 255.
Insignis pine for butter-factory construction, 324.
International Veterinary Congress, 286.

K.

Kidson, E.—Weather records, 73, 138, 211, 286, 360, 430.
Kikuyu-grass for North Auckland conditions, 289.
Kohlrabi for stock-feeding, 432.

L.

Lambs, ante-natal deformity of, 294.
Lambs, Down-cross, from Ruakura, 357.
Leighton, F. T.—
Importation of fertilizers in 1929–30, 338.
The purchase of fertilizers, 392.
Levy, E. Bruce, and Davis, Wm.
Relationship and control of annual grasses and clovers in pasture: The Hawke's Bay and Poverty Bay flats, 147.
Perennial rye-grass strain investigation, 363.
Lice on horse, treatment for, 71.
Limestone, ground, and burnt lime, 433.
Limestones, commercial ground, examined, 215.
Live-stock Division.—Hogget mortality and its prevention, 38.
Lowe, C.—Flue-barn curing of tobacco-leaf, 320.
Lymphangitis in mare, 145.
Lyons, J.—Parturition in bovines, 23, 100.

M.

Maize cribs, 306.
Maize, storage of, on the farm, 306.
Mare in poor condition, 217.
McIlwaine, J. E.—
The clipping of horses, 274.
Castration of pigs and calves, 415.

McIndoe, G. H.—The orchard, 57, 128, 204, 275, 345, 421.
Milk, separation of, at varying temperatures, 52.
Mines Department.—Prospecting for phosphate rock, 407.
Mint, destruction of, 71.
Morgan, G. F. V.—
Organism producing burnt flavour in cream or butter, 108.
A case of openness in cheese due to yeast fermentation, 178.
Mortality among hoggets and its prevention, 38.
Motion, J. Hill.—Diseases of dairy cows, 31, 75, 181.

N.

Nettle, tree stinging, and farm animals, 433.
Nicholls, J. E.—Empire wool survey: Report on New Zealand conditions, 311.
Nitrate organization, Chilean, 433.
North Auckland dairy-farm groups, an economic survey of, 241, 300.
Noxious weeds, 429.
Noxious weeds orders, 70, 215.

O.

Oats, estimated yield of, 146.
Orchard, the (monthly notes), 57, 128, 204, 275, 345, 421.
Orchard spray piping systems, 83.
Organism producing burnt flavour in cream or butter: Streptococcus isolated at Wallaceville Laboratory, 108.
Outdoor culture of table grapes: Some recommended varieties, 322.

P.

Packing of apples and pears for export: Some faults and how to remedy them, 309.
Parasites, internal, in lambs, remedies for, 216.
Parturition in bovines, 23, 100.
Paspalum: Establishing on unploughable country, 216.
Pasture seed mixtures, 124.
Pasture top-dressing on farms, statistics of, 143.
Pears, cracking of, 432.
Perennial rye-grass strain investigation: Data from trials at the Plant Research Station, 363.
Phalaris species, 256.
Phormium fibre, bonus offered for major improvements in manufacture of, 218.
Phormium investigations, 299.
Phosphate deficiency, farm practice for, 358.
Phosphate rock, prospecting for, 407.
Pigs, classification of, 83.
Pigs, lame, 289.
Pig recording: First report on work of Waikato, Manawatu, and Mid-Canterbury groups, season 1928–29, 11.
Piping systems in orchards, 83.
Planning of the test-room at dairy factories, 391.
Poisoning of live-stock: Some common mineral and plant poisons, 386.
Potatoes, seed, certification of, 354.
Poultry-keeping (monthly notes), 59, 130, 206, 277, 348, 422.
Potatoes, grading of certified seed, 264.
Potato-growing, early, in Franklin County, 232.
Poultry industry in New Zealand, an economic survey of, 173.
Prospecting for phosphate rock: Procedure under the Mining Act, 407.
Pukekohe, manurial experiments on early potatoes at, 232.
Purchase of fertilizers: Meaning and use of the invoice certificate, 392.

R.

Ragwort control by spraying with sodium chlorate and calcium chlorate, 291.
Ragwort moth, distribution of, 199.
Rainfall at representative stations, 73, 138, 211, 286, 360, 430.
Recording of pigs, report on, 11.
Relationship and control of annual grasses and clovers in pasture: The Hawke's Bay and Poverty Bay flats, 147.
Review: "Fungous Diseases of Plants," 429.
Ruakura, Down-cross lambs from, 357.
Ruawai group of dairy-farms, an economic survey of, 244.
Rural finance in New Zealand: The intermediate credit system and long-term advances, 395.
Rural land, occupied, utilization of in New Zealand, 199.
Rye-grass seed, certification of, 1929–30 season, 68.
Rye-grass strain investigation at Plant Research Station, 363.
Ryeland Sheep Society, standard mark for, 137.

S.

Salting of cheese, 172.
Sawers, J. B.—Some notes on starters for cheesemaking, 319.
Seasonal notes, 53, 124, 200, 272, 341, 417.
Separation of milk at varying temperatures, 52.
Sheep, blindness in, 358.
Sheep-farming on hill country in North Island, 1.
Sheep-shearing, 356.
Sheep flocks in New Zealand, 1928 and 1929, 92.
Sheep of New Zealand (stud flocks), 311.
Ships' garbage, introduction of, prohibited, 359.
Shows, agricultural, 74, 146, 218.
Shows, winter, 290, 362.
Simpson, B. W., and others.—Iodine deficiency and live-stock, 226.
Simpson, B. W., and Strand, R.—Feeding of iodine to poultry, 403.
Singleton, W. M.—
Testing of purebred dairy cows: Review of the certificate-of-record system in 1929, 159.
Slaughtered stock, 1929–30, 434.
Smith, J. M.—Stratford Demonstration Farm, season 1928–29, 112.
Sodium and calcium chlorates, spraying with, for control of ragwort and other weeds, 291.
Sodium chlorate, precautions in use of as a weed-killer, 144.
Some notes on starters for cheesemaking, 319.
Spartina Townsendii: A valuable grass for reclamation of mud-flats: 2. Experience in New Zealand, 189.
Spray injury to apple-trees, 146.
Standard mark for Ryeland Sheep Society, 137.
State Forest Service—
Trees for shelter and other farm purposes, 334.
Tree-planting methods, 410.
Standardized cheese, calculating yield of per pound of fat, 180.
Starters for cheesemaking, 319.
Statistics of farm machinery and engines, 225.
Statistics of irrigated lands in New Zealand, 255.
Statistics of pasture top-dressing on farms, season 1928–29, 143.
Sterility in dairy cows, 31.
Sterility, temporary, in dairy cows, 75, 181.
Stock slaughtered, 1929–30, 434.
Stock slaughtered on farms, 123.
Storage of maize on the farm: Improved types of crib, 306.
Strand, R.—See B. W. Simpson and R. Strand 403.
Stratford Demonstration Farm: Notes on operations in 1928–29 season, 112.
Streptococcus producing burnt flavour in milk or cream, 108.

T.

Table grapes, outdoor culture of, 322.
Tall fescue, eradication of, in Manawatu district, 93.
Temporary sterility in dairy cows, 75, 181.
Tennent, R. B.—Gore Experimental Area, season 1928–29,
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1929, 159.
Testing of purebred dairy cows: C.O.R. lists, 65, 140, 284.
Test-room at dairy factories, planning of, 391.
Threshings of wheat and oats, 290, 434.
Tiller, L. W.—Cold storage of apples, 271.
Tobacco-culture notes, 62, 135, 209.
Tobacco-leaf, flue-barn curing of, 320.
Tokaanu soils map, 74.
Top-dressing on farms, statistics of, 143.
Toowoomba canary-grass, 256.
Tree-planting methods, 410.
Tree stinging-nettle and farm animals, 433.
Trees for shelter and other farm purposes, 334.
Tutira, grassland evolution at, 84.

U.

Udy, W. H.—Butterfat losses in buttermilk, 118.
Utilization of occupied rural land in New Zealand, 199.

V.

Veterinary Congress, International, 283.
Vineyard, starting in Hangatiki district, 216.

W.

Walker, C.—Storage of maize on the farm, 306.
Warts on cows' teats, treatment for, 359.

Weather records, 72, 138, 211, 286, 360, 430.
Weed control by spraying with sodium and calcium chlorates, 291.
Weeds, noxious, 429.
Weeds, noxious, orders, 70, 215.
Wheat and oats threshings, 290, 434.
Wheat, oats, and barley, estimated yields of, 146.
Wheat research, 217.
Wireworm pest, control of, 144.
Wood-taint in butter and Cellophane paper, 406.
Woodfin, J. C.—Outdoor culture of table grapes, 322.
Wool clips, 144.
Wool survey, Empire, 311.
Woolly finger-grass, 28.
Wools of New Zealand, 311.

Y.

Yarrow, ridding lawn of, 359.
Yeast fermentation in cheese, 178.
Yeasts and moulds in butter, 299.

Z.

Zotov, V. D.—See H. H. Allan and V. D. Zotov, 256.

[500/6/30—3986
